### FAA Certified Aircraft Instrument Bearings

Pacamor Kubar Bearings (PKB) has gained additional quality certifications which

support production capabilities to include a full range of miniature and instrument ball bearing assemblies specific to Federal Aviation Administration Technical Standard Order TSO-C149.

Ed M. Osta, PKB's Executive Vice President stated, "Customer service has been further elevated by yet another FAA quality certification. We are pleased that our Quality Manager, Chris Lake, has been granted a Certificate of Designation from the Federal Aviation Administration (FAA) as a Designated Manufacturing Inspection Representative (DMIR)."

With the DMIR designation, PKB's Chris Lake is approved to perform various functions on behalf of the FAA such as the issuance of Original Airworthiness Certificates (Form 8130-3) and Export Airworthiness Certificates for PKB TSO-C149 Aircraft Bearings. Lake may also conduct any inspections necessary to determine that prototype or production parts conform to design specifications and are in a condition for safe operation.

The company also announced its continued on-time delivery of 99.4% for all FAA TSO-C149 Aircraft Bearings. Stephen Angrisano, PKB's Chief Financial Officer added, "PKB's on-time delivery record of quality aerospace instrument bearings puts us in a unique position in the industry." PKB, an award winning domestic manufacturer for Defense Supply Center Richmond (DSCR), manufactures a full range of appropriately DFARS compliant miniature and instrument ball bearings at its ISO 9001:2000 and AS 9100:2004 certified factory in Troy, NY.

Pacamor Kubar Bearings (PKB) manufactures high performance miniature and instrument ball bearings for the aerospace, defense, medical, dental, industrial, and commercial industries. Customers include major aerospace manufacturers and key resellers as well as various national laboratories and prestigious government organizations such as the National Aeronautics and Space Administration (NASA). PKB provides these industries with precision ball bearings, including those with unique designs and materials used at sub-cryogenic temperatures.

## Congratulations to Chief Master Sergeant Lambers, From Your Friends at PKB

Pacamor Kubar Bearings (PKB) wishes Chief Master Sergeant Phillip Lambers all the best in his retirement from the United States Air Force 251st Combat Communications Group.

"You and your team exemplified the traits that embody the concept of good Military Bearing, going above and beyond when given a task, and your team volunteered to boot," stated SMSgt Esser in response to a small gift of gold plated ball bearings for the Chief Master Sergeant's farewell.

PKB is pleased and honored to add to the retirement ceremony with several ball bearings that were specially gold plated to commemorate this important event. "Special thanks Senior Master Sergeant Michael Esser for inviting PKB to participate in this way", stated Jodi Radley, PKB Government Sales Representative.
